No 7, close one, Zone 3 imutun CDA Lusada ogun state

EDUCATION

Lagos state university, Nigeria: Computer Science   **CGPA: 4.33 / 5.0**

- Expected Graduation Date: **July 2025**
- Relevant Coursework: Data Structure and Algorithm, DBMS, Operating system, System Architecture

WORK EXPERIENCE

- **Freelance Web Developer**   **Aug 31, 2023**

  I worked along side a product designer to developed a responsive webpage for an organization using HTML, TAILWIND CSS, and JAVASCRIPT.

PROJECTS   **https://github.com/okondev2021**

- **Twitter Clone : Social Media Application | HTML, CSS, DJANGO, POSTGRES DB, AJAX**
  - Built a real-time social media application allowing users to create accounts, login, logout, post messages (tweets), follow other users, and like tweets.
  - Implemented user authentication using secure methods to protect user data.
  - Developed a feed system to display tweets from followed users in real-time.

- **Wikipedia Clone: Online Encyclopedia | HTML, CSS, DJANGO, POSTGRES DB, MARKDOWN**
  - Implemented a search function allowing users to easily find specific information.
  - Integrated user accounts for registered users to contribute content and track their edits.

- **Ebay Clone: Online Marketplace | HTML, CSS, DJANGO, POSTGRES DB, AJAX**
  - Built an e-commerce platform facilitating online auctions and sales between buyers and sellers.
  - Integrated a comment section to enhance buyer and seller trust.
  - Developed a product listing system with detailed descriptions, images, and bidding functionalities.

- **Donation Management Web Application: Charity Platform | HTML, CSS, DJANGO, POSTGRES DB, AJAX**
  - Created a web platform connecting donors with individuals or groups in need of assistance.
  - Integrated dual donation methods enabling donors to contribute financially or donate material items through an e-commerce integration.
  - Implemented a request system allowing donees to raise requests for help, including attaching supporting documents or images for verification by site admins.
  - Developed a user management system with separate interfaces for help seekers (donees) and donors.
